Responsive Design

ABOUT ME

When writing my first line of code over three years ago, my passion for programming was born. I chose to divert all my focus from my self-started automotive business into ceaseless learning and progression into the web development field. I thrive on learning new things, and retain the focus and patience required to accomplish the goals or projects set before me.

EXPERIENCE/PROJECTS

These projects, links to code base, extended summaries, as well as other projects, can be found on my website: kylelynch.me

Tech Cart E-Commerce Application

Shopping cart built with a Next.js/React front-end and Commerce.js headless CMS backend. Styled with TailwindCSS.

This application lets users add, delete, or edit quantity of items in a cart. Features multi-step form, image carousel, and item details page.

Live demo: <https://next-tech-cart.vercel.app>

Blog Website

Modern blog website built with a Next.js/React frontend and Contentful headless CMS backend, utilizing styled JSX for styling. Featuring article search filter, contact form, light/dark mode, easy customization using Css custom properties, focus on accessibility and semantic elements.

Live demo: <https://kylelynch-blog.vercel.app>

Mock Miami Travel Website

One of my early, fully self-created projects to excersize my React skills. Features calls to weather and webcam APIs, optimized for performance, custom image carousel, uses a variety of React hooks. Styled with SASS and uses Framer Motion for page transitions.

Live demo: <https://miami-travel.netlify.app>

EDUCATION

Online courses on Udemy and other platforms by Traversy Media, Stephen Grider, Shaun Pelling, John Smilga, Akshay Saini, and more.

SOFT SKILLS

Positive attitude, reliable, strong work ethic, problem solver, clear communicator, attentive listener, fast learner, happily accept direction/help/correction, I get along with absolutely every person.
